EduSphere Overseas Counselor CRM — Documentation Analysis and Plan

Scope, features, roles, product findings and capture sessions (planning stage, not browser-verified)

Planned 2026-10-29

Contents

EduSphere Overseas Counselor CRM — Documentation Analysis (Phase 1)

- 1. Application Overview
- 2. Module Inventory
- 3. Feature Inventory
- 4. User Role Inventory
- 5. Role Permission Matrix (summary; detail in appendix 03 §8)
- 6. Frontend Route Inventory (in scope)
- 7. Backend API Mapping
- 8. Major User Workflows
- 9. Required Screenshots
- 10. Required Test Data (created through the UI by capture specs; all `Docs` prefixed, `@example.test`)
- 11. Unknown Workflows Requiring Browser Verification
- 12. Product Findings and Open Questions (owner)

Overseas Counselor CRM User Documentation — Implementation Plan (Phase 2)

- Global Constraints
- Review Focus
- File structure (created across sessions)
- Sessions

EduSphere Overseas Counselor CRM — Documentation Analysis (Phase 1)

> Session S1 · 2026-10-29 · Code baseline `main` @ `045d8c40` · Reviewed from source only (no browser work yet). Evidence lives in `discovery/01..04` (file:line references). This file is the summary the plan builds on.

1. Application Overview

1.1 What the Counselor CRM is

The Overseas counselor works a student from first conversation to arrival abroad:

1. **Leads** come from telecaller handover (tel-018), website enquiries, or walk-ins the counselor records (csc-004).
2. The counselor logs calls, WhatsApp, email, meetings and notes, sets follow-ups and a next action, and moves the lead through its stages.
3. A qualified lead is **converted** to a student account (ccrm-008, reusing the csc-002 welcome link), or linked to an existing one.
4. On the **Student 360** the counselor keeps the structured profile and notes and creates **applications**. They then move each application through its stages and sub-statuses, gated by the document checklist (ccrm-019).
5. The counselor records **offers** and their conditions, **interviews**, **deposits**, the **visa** lifecycle, **enrolment** and **arrival/orientation**.
6. The daily tools are the **Dashboard** (action tiles and quick search), **Tasks**, **Calendar** with an iCal feed, **Reports** (My performance) and **Universities**.
7. The **Overseas Admin** creates counselors, assigns students and applications to them, watches overdue work (escalation), configures checklists, reminder rules and message templates, and restores archived students.

1.2 Technology (from code)

- Next.js 15 web app (`apps/web`) and FastAPI (`apps/api`) on PostgreSQL.
- Celery worker and beat run the reminder engine, escalation, expiry jobs and email retries (appendix 04 §1.4).
- Dev email goes to Mailpit, added by the docs compose override.

1.3 Authentication (appendix 03 §1)

- Counselors sign in at **/overseas/login** and land on `/overseas/counselor/dashboard` .
- The Overseas Admin also signs in at /overseas/login. The Super Admin signs in at **/admin/login**.
- First access is through the 72-hour welcome/set-password email. Forgot/reset password, Change password and My profile are reached from the sidebar footer.
- A deactivated counselor gets the generic `Invalid credentials` message.

1.4 Cross-cutting rules worth explaining in every manual

- **Caseload.** A counselor sees:

    - leads they own in their own division;
    - students linked to them (csc-001);
    - students of applications assigned to them.

  Anything else shows as “not found” (appendix 01 §1, 02 §0).

- **Lead permissions are state-driven** (appendix 01 §1 table):
    - Return: only when no student is linked.
    - Link: only when no student is linked and the lead is not closed.
    - Convert: only from Qualified up to Counselling Completed.
    - Activity, follow-ups and next action: only on open leads.
- **Lead stages.**
    - Open: New Lead → Converted (11 stages).
    - Closed: Not Interested, Not Eligible, Invalid Contact, No Response, Lost, Duplicate. Closing a lead asks for a reason (ccrm-006).
- **Where application work happens.** All writes are made in the **Evaluate Applications** card on Students/Applications (appendix 02 §0). The 360 Applications tab only lists applications and adds new ones.
- **Agency vs direct.**
    - Counselors record offers, visa and enrolment on agency applications too (CC4).
    - A counselor-created application is always **direct**.
- **Due dates** for follow-ups, tasks and document requests must be today or later. Overdue states only arise as real days pass (owner D3).
- **Sidebar names differ from page titles:**

Sidebar	Page title
Tasks	My tasks
Leads	My leads
Reports	My performance
Students	Application Tracking

  Docs name both the first time.

2. Module Inventory

Code	Module	Portal	Features
AUTH	Account access	Counselor	6
NAV	Portal tour	Counselor	1
DASH / SRCH	Dashboard and quick search	Counselor	2
LEAD	Leads	Counselor	9
CONV	Lead → student	Counselor	2

Code	Module	Portal	Features
ACT	Activity logging on a lead	Counselor	6
CHAT	Counselor chat with students	Counselor	1
FUP	Follow-ups and reminders	Counselor	3
TASK	Tasks	Counselor	1
CAL	Appointments and calendar feed	Counselor	2
REP	My performance	Counselor	1
UNI	Universities	Counselor	2
STU	Students, 360, profile, notes, archive	Counselor	10
APP	Applications	Counselor	10
OFR	Offers, conditions, interviews	Counselor	3
DOC	Checklists, documents, requests	Counselor	4
VISA	Visa lifecycle	Counselor	1
FIN	Deposits, finance tab, receipts	Counselor	3
ARR	Enrolment, arrival, orientation	Counselor	2
HO	Handoffs into the counselor	Counselor + other roles	4
ADM	Counselor accounts and assignment	Overseas Admin / Super Admin	4
ESC	Overdue work and escalation	Overseas Admin	2
PERF	Counselor performance	Overseas Admin	2
CFG	Checklists, reminder rules, templates, archive restore	Overseas Admin	4
Total			**85**

3. Feature Inventory

Full records with labels, fields, messages and evidence are in the appendices. Discovery IDs were consolidated as follows:

- Discovery ADM-003/004 (walk-in student) → **STU-003**.
- Discovery ADM-005 (walk-in lead) → **LEAD-002**.
- Discovery ADM-008 (lead owner change) has no UI, so it is product finding P15 rather than a feature.
- Discovery CFG-005 and NAV-002 are notes, not features.
- Discovery FIN-004 (commission) is folded into ARR-001.
- **CHAT-001** was added from the sidebar.

Doc ID	Feature	Appendix
DOC-CNS-AUTH-001	Sign in to the Overseas portal	03 §1
DOC-CNS-AUTH-002	Set your first password from the welcome email	03 §1
DOC-CNS-AUTH-003	Forgot / reset your password	03 §1
DOC-CNS-AUTH-004	Change your password	03 §1
DOC-CNS-AUTH-005	My profile	03 §1
DOC-CNS-AUTH-006	Sign out, ended sessions, deactivated account	03 §1
DOC-CNS-NAV-001	Portal tour: 15-item sidebar, top bar, mobile menu	01 §0, 03 §2
DOC-CNS-DASH-001	Counselor dashboard (action tiles + application table)	01 DASH
DOC-CNS-SRCH-001	Quick search	01 SRCH
DOC-CNS-LEAD-001	My leads list	01 LEAD
DOC-CNS-LEAD-002	Record a new walk-in lead	01 LEAD, 03 ADM-005
DOC-CNS-LEAD-003	Lead detail page layout	01 LEAD
DOC-CNS-LEAD-004	Lead details: view and edit contact, consent, referral	01 LEAD
DOC-CNS-LEAD-005	Next action	01 LEAD
DOC-CNS-LEAD-006	Change stage, record loss, close a lead	01 LEAD
DOC-CNS-LEAD-007	Lead qualification	01 LEAD
DOC-CNS-LEAD-008	Return a lead to the telecaller	01 LEAD
DOC-CNS-LEAD-009	Student and milestones panel (read only)	01 LEAD
DOC-CNS-CONV-001	Convert a lead to a new student	01 CONV
DOC-CNS-CONV-002	Link / unlink an existing student account	01 CONV
DOC-CNS-ACT-001	Log a call	01 ACT
DOC-CNS-ACT-002	Record a WhatsApp message	01 ACT
DOC-CNS-ACT-003	Email a lead	01 ACT
DOC-CNS-ACT-004	Log a meeting	01 ACT
DOC-CNS-ACT-005	Lead notes	01 ACT
DOC-CNS-ACT-006	Lead activity timeline	01 ACT
DOC-CNS-CHAT-001	Counselor Chat with students	01 §0 (sidebar 12), ccrm-044
DOC-CNS-FUP-001	Follow-ups on a lead	01 FUP
DOC-CNS-FUP-002	Overdue follow-ups on the Tasks page	01 FUP
DOC-CNS-FUP-003	Automatic reminders (what triggers them, where they show)	01 FUP, 04 §1.4
DOC-CNS-TASK-001	My tasks	01 TASK

Doc ID	Feature	Appendix
DOC-CNS-CAL-001	Appointments page and lead appointments	01 CAL
DOC-CNS-CAL-002	Calendar and iCal feed	01 CAL
DOC-CNS-REP-001	My performance	01 REP
DOC-CNS-UNI-001	Partner universities list	01 UNI
DOC-CNS-UNI-002	University 360 view (incl. course commission display)	01 UNI
DOC-CNS-STU-001	Students page: Application Tracking table and filters	02 STU
DOC-CNS-STU-002	My students card (Source filter, search)	02 STU
DOC-CNS-STU-003	Add a walk-in student / edit pending / resend link	02 STU, 03 ADM-003/004
DOC-CNS-STU-004	Student 360: header, tabs, Overview	02 STU
DOC-CNS-STU-005	Structured profile (Academic / Preferences / English)	02 STU
DOC-CNS-STU-006	Internal student notes	02 STU
DOC-CNS-STU-007	Activities and History tabs	02 STU
DOC-CNS-STU-008	Archive a student / Archived Students	02 STU
DOC-CNS-STU-009	Overseas consent (read only for staff)	02 STU
DOC-CNS-STU-010	When a student or application is reassigned to you	02 STU
DOC-CNS-APP-001	Add an application from the 360	02 APP
DOC-CNS-APP-002	Intake Month YYYY picker	02 APP
DOC-CNS-APP-003	Applications tab list (EduSphere ID)	02 APP
DOC-CNS-APP-004	Advance an application’s stage	02 APP
DOC-CNS-APP-005	Sub-status and the Ready-for-Submission gate	02 APP
DOC-CNS-APP-006	Journey stage	02 APP
DOC-CNS-APP-007	Record an outcome / resume	02 APP
DOC-CNS-APP-008	Application details (fields and dates)	02 APP
DOC-CNS-APP-009	Application status history	02 APP
DOC-CNS-APP-010	Agency vs direct applications	02 APP
DOC-CNS-OFR-001	Record, close or decide an offer	02 OFR
DOC-CNS-OFR-002	Offer conditions	02 OFR
DOC-CNS-OFR-003	Admission interviews	02 OFR
DOC-CNS-DOC-001	Application document checklist	02 DOC
DOC-CNS-DOC-002	Documents page and document status	02 DOC
DOC-CNS-DOC-003	Request documents from the student	02 DOC

Doc ID	Feature	Appendix
DOC-CNS-DOC-004	Upload a document for the student (incl. offer letter)	02 DOC
DOC-CNS-VISA-001	Start and track a visa case	02 VISA
DOC-CNS-FIN-001	University deposit record	02 FIN
DOC-CNS-FIN-002	Finance tab: fees, payments, deposits, refunds	02 FIN
DOC-CNS-FIN-003	Upload a deposit receipt / payment proof	02 FIN
DOC-CNS-ARR-001	Confirm enrolment (agency commission note)	02 ARR
DOC-CNS-ARR-002	Arrival and orientation	02 ARR
DOC-CNS-HO-001	A telecaller hands a lead to you	03 HO
DOC-CNS-HO-002	A website enquiry becomes your lead	03 HO
DOC-CNS-HO-003	Agency students and applications	03 HO
DOC-CNS-HO-004	Self-registered students	03 HO
DOC-CNS-ADM-001	Create a counselor account	03 ADM-001
DOC-CNS-ADM-002	Manage counselor users: set-up status, re-send link, edit, deactivate	03 ADM-002
DOC-CNS-ADM-003	Assign / change a student's counselor (with reason)	03 ADM-006
DOC-CNS-ADM-004	Assign / change an application's counselor (with reason)	03 ADM-007
DOC-CNS-ESC-001	Counselor tasks (admin view)	03 ESC
DOC-CNS-ESC-002	Overdue by counselor and the escalation notice	03 ESC
DOC-CNS-PERF-001	Team performance	03 PERF
DOC-CNS-PERF-002	One counselor's report	03 PERF
DOC-CNS-CFG-001	Document checklist templates	03 CFG
DOC-CNS-CFG-002	Reminder rules and Run now	03 CFG
DOC-CNS-CFG-003	Counselor message templates	03 CFG
DOC-CNS-CFG-004	Archived students: admin restore	03 CFG

4. User Role Inventory

Role	Sign-in	Landing	In this set
Counselor (`counselor` , division overseas)	/overseas/login	/overseas/counselor/dashboard	User manual
Overseas Admin (`overseas_admin`)	/overseas/login	/overseas/admin/*	Admin manual

Role	Sign-in	Landing	In this set
Super Admin (`super_admin`)	/admin/login	/admin/*	Admin manual: differences only (§5)
Telecaller, Agent, Student	their own portals	—	Touchpoints in HO-001..004 only
IT counselor	/it/login	/it/counselor/*	**Out of scope**

5. Role Permission Matrix (summary; detail in appendix 03 §8)

Capability	Counselor	Overseas Admin	Super Admin
Work own leads, students, applications	✅	—	❌ Pages open but data calls fail (P3)
Create counselor	—	✅ Division locked to Overseas	✅ Division defaults to **IT** (P4)
Deactivate / re-send link	—	✅ Users page only, not Counselors page	✅
Assign student / application counselor	—	✅	❌ (403, column hidden)
Counselor tasks, performance, checklists, reminder rules, message templates	—	✅	URL only; shows Overseas Admin nav
Archived-student restore	Archive own linked students	✅	❌ "Overseas Administrator role required"
Receives escalation notice	—	✅	❌

6. Frontend Route Inventory (in scope)

- **Counselor:** /overseas/counselor/
  - Sidebar: dashboard, tasks, students, leads, documents, applications, universities, visa, appointments, calendar, counselor-chat, reports, archived-students.
  - Not in the sidebar: leads/new, leads/[id], students/[id] (+ /notes, /profile), universities/[id].
  - `school-applications` is listed in the sidebar but out of scope (§11).
  - `/account/management-tasks` is a shared page, noted only.
- **Account:** /overseas/login, /admin/login, set-password and reset pages, /account/password, /account/profile.
- **Admin:** /overseas/admin/users, /overseas/admin/counselors, counselor-tasks, counselor-performance and /[id], checklists, reminder-rules, message-templates, archived students. On the Super Admin side: /admin/users.

7. Backend API Mapping

See appendix 01 (counselor_dashboard, counselor_search, counselor_tasks, counselor_reminders, counselor_messages, counselor_walk_in_leads, lead_handover, lead_appointments, calendar_feeds, university_view), appendix 02 (student_360, counselor_students, student_profiles, workflows, application_offers, application_checklists, application_interviews, document_checklists, student_document_requests) and appendix

03 (admin, portal, counselor_performance). The decision map (DEC-SCOPE / API / RBAC per item) is in appendix 04 §3.

8. Major User Workflows

1. **Telecaller handover → counselling → conversion:** HO-001 → LEAD-003..007 → ACT → FUP → CONV-001.
2. **Walk-in:** LEAD-002 or STU-003 → STU-004/005 → APP-001.
3. **Application to offer:** APP-001 → DOC-001/003 → APP-005 (Ready-for-Submission) → APP-004 → OFR-001/002/003.
4. **Offer to arrival:** OFR-001 (accept) → FIN-001/003 → VISA-001 → ARR-001 → ARR-002.
5. **Admin oversight:** ADM-001 → ADM-003/004 → ESC-001/002 → PERF-001/002.

9. Required Screenshots

About 170 to 200 PNGs: at least one per step, plus “what each role sees” variants and error/locked states. Settings and naming are in plan §Global Constraints.

10. Required Test Data (created through the UI by capture specs; all `Docs` prefixed, `@example.test`)

- **Personas (owner D1)**, all Overseas:
  - Docs Counselor A (main), Docs Counselor B (reassignment and comparison), Docs Counselor C (to deactivate);
  - Docs Telecaller (handover);
  - students: Docs Walk-in Student, Docs Converted Student, Docs Pending Walk-in, Docs Self-registered Student.
  - The seeded Overseas Admin and Super Admin are used for admin screens. `demo-accounts.md` maps the personas to the seeded demo accounts.
- **Catalogue:** Docs University with two Docs courses, using fictional commission values (owner D5, for example 10% university and 12% course).
- **Config:** one Docs checklist template (block mode), reminder rules left at their defaults, one Docs message template.
- **Work:** leads at several stages, including a closed one and a duplicate; follow-ups, tasks and appointments dated relative to capture day; two direct applications on Docs Counselor A; one agency application (seeded Ananya, assigned to Docs Counselor A).

11. Unknown Workflows Requiring Browser Verification

- How the dashboard table’s Status cell renders.
- The stage a walk-in lead shows right after creation.
- Timeline wording per event.
- Whether reminders are emailed.
- What the Super Admin sees on /overseas/admin/users.
- What the Overseas Admin is told when an agency application arrives with no counselor.
- Who owns the lost-reason catalogue.
- What the **School Applications** and **Management tasks** sidebar items show to an Overseas counselor. Both are recorded as discovered functionality.

12. Product Findings and Open Questions (owner)

Documented as built, in neutral wording. P1–P22 are code-read candidates; P4 was confirmed in the browser in S2; each is confirmed or dropped in the browser session that covers it.

#	Finding	Evidence	Docs impact
P1	Reminder notifications have no counselor inbox: no Notifications item or page for counselors	`counselor_reminders.py:189`, `navigation.ts:292`	FUP-003
P2	"Return to telecaller" is offered on closed leads. Returning one clears the owner but stays closed, and keeps no reason in history. The form says "goes back to Follow-up"	`lead_handover.py:124`, `lead_stages.py:53`, `CounselorLeadDetail.tsx:96`	LEAD-008
P3	Super Admin opening counselor Leads or Dashboard gets load errors, not an access message	`portal.py:43`, `counselor_dashboard.py:19`	NAV-001, admin README
P4	Super Admin create-user defaults Division to IT. A counselor created that way cannot sign in at /overseas/login	`WorkflowPanel.tsx:389`	ADM-001
P5	Counselor messages say "Ask a telecaller manager…" and "A manager can reopen it…"	`AdminLeadStage.tsx:136`, `lead_follow_ups.py:32`	LEAD-006, FUP-001
P6	Dashboard "View all" links open the unfiltered My leads list. My leads has a Priority filter but no Priority column	`CounselorDashboardPanel.tsx:20`, `CounselorLeadsPanel.tsx:75`	DASH-001, LEAD-001
P7	Quick-search application hits open a filtered list, not the application. The results text shows a literal "–"	`counselor_search.py:117`, `CounselorQuickSearch.tsx:76`	SRCH-001
P8	Appointment no-show success text reads "Appointment no show."	`LeadAppointmentCard.tsx:58`	CAL-001
P9	My performance counts IT and Overseas leads together; My leads shows only one division	`counselor_performance.py:32`	REP-001
P10	Cancelled tasks vanish (the UI has a band, but the API never returns them)	`counselor_tasks.py:28`	TASK-001

#	Finding	Evidence	Docs impact
P11	The counselor cannot book a lead appointment from the lead page; “Counselling Scheduled” can be set without one	`leadStages.ts:47`	LEAD-006, CAL-001
P12	Student notification after an advance shows the raw stage code (e.g. `visa_documentation`)	`workflows.py:2730`	APP-004
P13	Agency enrolment: the Enrolment panel lets a counselor confirm, while advance/sub-status say “Only the agency’s Master confirms enrollment”	`application_offers.py:445`, `workflows.py:202`	ARR-001, APP-010
P14	Evaluate Applications cards show no EduSphere ID or intake; there is no counselor screen to change an existing intake	`CounselorEvaluationPanel.tsx:19`, `applicationDetails.ts:11`	APP-002, APP-008
P15	Changing a lead’s counselor (owner + reason, ccrm-003 A7 / ccrm-033) is API-only: no admin screen	`AdminLeadManagementPanel.tsx`	ADM README
P16	Archive gaps: the archived list shows only csc-001-linked students; only the linked counselor can archive; profile edits and document requests still work on an archived student	`student_archive.py:49,119`	STU-008
P17	The 360 “Counselor” field shows only the csc-001 link (“Not assigned” for the application counselor). The My students application count includes other counselors’ applications	`counselor_student_360.py:105`, `counselor_students.py:280`	STU-004, STU-002
P18	Below 980 px there is no Sign out (no sidebar, and the mobile menu has no item for it)	`globals.css:12`, `PortalShell.tsx`	NAV-001, AUTH-006
P19	Deactivating a counselor has no guard or handover; their work stays on the inactive account	`admin.py:839`	ADM-002
P20	A telecaller handover sends no direct notice; it relies on the “New lead assigned” reminder rule	`lead_handover.py:46`	HO-001

#	Finding	Evidence	Docs impact
P21	The 360 has no Visa tab and no document-review action; counselors cannot download invoices/receipts on Finance; any caseload counselor can upload a payment proof	appendix 02 VISA/DOC/FIN	VISA-001, DOC-002, FIN-002/003
P22	A counselor-created application for an agency student is always direct	`workflows.py:2435`	APP-001, APP-010
P23	(Found in S2, browser) The Overseas Admin's **Manage users** table is 716 px wide inside a 500 px panel at 1440 px: the Status badge is clipped and the Action column is off-screen; acting on a row scrolls the name out of view	`/overseas/admin/users`, `AdminUserManagementPanel.tsx`	ADM-002

Default-based behaviours (owner D4). About 40 counselor decisions are builder defaults marked NEEDS_CONFIRMATION or UNVERIFIED, not owner-approved (appendix 04 §3, column "Authority"). Manual pages describe them as built, with no warning banners. The owner reviews that list separately.

Owner answers recorded for this set (2026-10-29): - **D1** Docs personas plus a `demo-accounts.md` mapping. - **D2** Scope: Overseas counselor plus the admin side; IT counselors out. - **D3** Time-dependent states are captured on real later days, and reminders/escalation use the Overseas Admin's **Run now**. No SQL back-dating. - **D4** Default-based behaviours are documented as built and listed here only. - **D5** Commission fields are shown with Docs test values only. - **D6** The `cnsdocs` stack (3050/8050/8029) may be started, seeded, reset and snapshotted by Claude. - **D7** Baseline is `main` @ 045d8c40, in `docs/counselor-crm/`.

Overseas Counselor CRM User Documentation — Implementation Plan (Phase 2)

> **For agentic workers:** REQUIRED SUB-SKILL: use superpowers:executing-plans. - Work one session at a time, in this plan's order; later sessions rely on data created earlier. - Tick the checkboxes here and update `docs/counselor-crm/documentation-progress.md` at the end of every session.

Goal: Produce verified end-user and administrator documentation, with role guides, for the EduSphere **Overseas Counselor CRM**. Screenshots are captured by Playwright from the running app.

Scope (owner D2): - In: the Overseas `counselor` portal, Overseas Admin counselor management and oversight, and Super Admin differences. - Telecaller, agent and student screens appear only at handoff points (HO-001..004). - Out: IT counselors.

Architecture: - **Feature files.** One Markdown file per Doc ID, using the template below: - Counselor: `docs/counselor-crm/user-manual/<module>/` - Overseas Admin / Super Admin: `docs/counselor-crm/admin-manual/<module>/` - **Screenshots** go in `docs/counselor-crm/screenshots/<module>/` and are indexed in `screenshot-index.md`. - **Source of behaviour.** Code reviewed in Phase 1 (`documentation-analysis.md` + `discovery/`), confirmed in the browser before it is written. - **Reproducibility.** Test-only Playwright capture specs live in `apps/web/tests/doc-capture/counselor/`.

Tech stack: - App: Next.js 15, FastAPI, PostgreSQL, Celery worker + beat, via Docker Compose. - Capture: Playwright (Chromium); the `browser-use` skill for exploration. - Output: Markdown.

Global Constraints

- **Scope.** The 85 Doc IDs in analysis §3. Anything else found goes into "Discovered functionality" in the progress file.
- **Do not edit** the Agent CRM docs (`docs/documentation-*.md` , `docs/user-manual/` , `docs/admin-manual/` , `docs/role-guides/` , `docs/screenshots/` , `docs/faq.md` , `docs/troubleshooting.md` , `docs/screenshot-index.md`), `docs/school-crm/` or `docs/bdm-crm/` .
- **Code baseline.** `main` @ `045d8c40` . When `main` moves, re-check features whose files changed (`git diff --stat 045d8c40..<new> -- apps/`).
- **No product code changes.** The capture tooling under `apps/web/tests/doc-capture/` and `docs/tooling/` is test/docs only.
- **Screenshot settings.**
  - Viewport **1440 × 900**, Chromium, light scheme, `deviceScaleFactor: 1` , locale `en-IN` , timezone `Asia/Kolkata` .
  - Viewport shots by default. Use `fullPage` only when a step needs the whole form, and note it in the index.
  - One 390 px mobile shot for NAV-001 (shows P18).
- **Screenshot path.** `docs/counselor-crm/screenshots/<module>/<NN>-<feature>-<step>.png` . Module folders: `account-access` , `navigation` , `dashboard` , `leads` , `conversion` , `activity` , `chat` , `follow-ups` , `tasks` , `calendar` , `reports` , `universities` , `students` , `applications` , `offers` , `documents` , `visa` , `finance` , `arrival` , `handoffs` , `admin` , `escalation` , `performance` , `config` .
- **Never show secrets.**

    - Mask password inputs, the dev-only "Demo accounts" card and "Development only" boxes (`shoot()` does this).
    - **Add a mask for the iCal feed URL (`#calendar-feed-url`)**: it is a live credential.
    - Never put a reset or welcome URL with a token in a doc or screenshot.
    - Never paste the seed password into a file. Never screenshot Mailpit.
- **Test data only (owner D1).**
    - Docs personas use `*@example.test`.
    - Every lead, student, university, course, template and task created for the docs is prefixed `Docs`.
    - Phone numbers come from the fictional range `+91 90000 1xxxx`.
    - Seeded demo records (Ananya, Vikram, Ritika) appear only where a seeded record is unavoidable (the agency application). No real people's data.
- **Commission (owner D5).** Commission fields are shown only on the Docs University and Docs courses, with fictional values (10% university, 12% course).
- **Time-dependent states (owner D3).**
    - Never back-date with SQL.
    - Overdue, expired and escalation states are captured on a later real day (S9).
    - Reminders and escalation are triggered with the Overseas Admin's **Run now**.
    - Record the capture date of each such PNG in the index.
- **VERIFICATION REQUIRED.** Anything not confirmed in the browser is written as **VERIFICATION REQUIRED** and left out of the numbered steps.
- **As-built (owner D4).**
    - Document behaviour as built, including product findings P1–P22 (analysis §12), in neutral wording. For example: "There is no Sign out on small screens; widen the window or use a desktop."
    - Default-based behaviours get no warning banners.
- **Writing style.** Simple English, numbered steps, bold UI labels exactly as on screen, one feature per file, the mandatory template.
- **Terminology** (use exactly):
    - **Roles: Counselor** (Overseas), **Overseas Admin**, **Super Admin**, **Telecaller**, **Agent** (agency Master/Staff), **Student**.
    - **Lead side: lead**, **stage** (open) / **closed** (with reason), **next action**, **follow-up**, **call log**, **meeting**, **note**, **handover**, **return**, **convert**, **link**.
    - **Student side: student**, **Student 360**, **walk-in student**, **application**, **EduSphere ID**, **stage**, **sub-status**, **outcome**, **journey stage**, **checklist**, **Ready for Submission**, **offer**, **condition**, **interview**, **deposit**, **visa case**, **enrolment**, **arrival**, **orientation**, **archive**, **consent**.
    - **Places:** use the sidebar label first, then the page title, e.g. "**Leads** (page title **My leads**)".
- **Capture helpers.**
    - Every spec calls `noPrefetch(context)` before navigating. Long cards use `shoot(..., { element })`, messages use `shoot(..., { center })`, and scrolls use `behavior: "instant"`.
    - Passwords only come from `DOCS_PASSWORD` / `DOCS_TEST_PASSWORD`.
    - IDs and emails pass between specs through `DOCS_CNS_FILE` (JSON, scratchpad only).
- **Docker (owner D6).**
    - Claude may start, seed, reset and snapshot the `cnsdocs` project only. Never touch other compose projects.
    - Never load the Caddy override.
    - The worker **and** beat must run.
- **Git.**
    - Commit on `docs/counselor-crm-user-guide` with `docs: add <module> Counselor CRM guide`.
    - Stage explicit paths only: `docs/counselor-crm/`, `apps/web/tests/doc-capture/counselor/`, and the shared tooling files when changed.

- Never stage `graphify-out/`, `.env` or `docker-compose.docs.yml`.
- The owner pushes.

Review Focus

1. **Same screen, different role.**
   - Applies to the 360, admin users page and counselor-admin pages (Counselor vs Overseas Admin vs Super Admin), and to agency vs direct applications.
   - Each such feature file has a **What each role sees** table and one screenshot per differing role.
2. **Locked states.**
   - Closed lead (no activity), linked lead (no return), converted lead, archived student.
   - The Ready-for-Submission gate (block vs warn), agency enrolment (P13), and a deactivated counselor.
   - Document the exact message for each.
3. **Where the work happens.** Application writes are in **Evaluate Applications**, not the 360 Applications tab. Steps must send the reader to the right card.
4. **Secrets in screenshots.** Open every new PNG before committing, especially the Calendar (feed URL) and login pages.
5. **Time-dependent behaviour.**
   - Today, overdue and next-7-days follow-ups.
   - Overdue tasks older than the escalation threshold.
   - Offer and document expiry (00:05 / 00:10 IST jobs).
   - 72-hour welcome links.
   - Record capture dates.

Add a **What each role sees** table after "Who Can Use This Feature" whenever roles differ.

Sessions

Dependency order and calendar (owner D3)

- **S2** builds the stack and tooling, configures the catalogue and templates, and creates the Docs personas. Everything depends on it.
- **S3** sets persona passwords from the welcome links. All later sessions sign in as Docs personas.
- **S4–S8** create the leads, activity, students and applications.
  - **Day 1 = the day S5 runs.** S5 creates follow-ups and tasks due **tomorrow**.
  - S7 creates an offer whose expiry is **tomorrow**, and a document request due tomorrow.
- **S9 runs at least 3 real days after S5**, so follow-ups and tasks are overdue past the escalation threshold (appendix 03: older than 2 days) and the offer has expired. Run reminders with **Run now**.
- **S10** (lifecycle: archive, restore, deactivate) runs last because it hides data.
- **S11** writes guides from the existing screenshots; **S12** reviews.

Rerun rule. Specs create data through the UI, so a rerun needs a fresh database: 1. Reset `cnsdocs` (`down -v`, `up -d`, migrate, seed). 2. Clear Mailpit. 3. Rerun the specs in session order.

To iterate on one session, restore the `pg_dump` snapshot from the end of the previous session (scratchpad only). A reset after S5 restarts the D3 calendar.

Standard session loop (S2–S10)

- [ ] **L1** Read `documentation-analysis.md`, this plan, `documentation-progress.md`, `screenshot-index.md` and the relevant `discovery/` sections.
- [ ] **L2** Fetch `origin/main`.
  - If it has moved past the baseline, list changed files touching this session's routes and re-review them.
  - Check the `cnsdocs` stack is up; start it if not.
  - Record the web URL and commit in the progress file.
- [ ] **L3** Explore each feature in the browser as each relevant role. Tick "Browser Verified" only for what was seen. Confirm or drop each product finding for these features.
- [ ] **L4** Write or extend `apps/web/tests/doc-capture/counselor/cns-sN-<module>.capture.ts` and run it. Open every PNG: readable, correct state, no secrets.
- [ ] **L5** Write one feature file per Doc ID using the template. Mark unconfirmed points **VERIFICATION REQUIRED**.
- [ ] **L6** Run `node docs/tooling/check-doc-links.mjs docs/counselor-crm` and fix broken links.
- [ ] **L7** Update `screenshot-index.md` and `documentation-progress.md` (status, unresolved items, discovered functionality, session log). Snapshot the database.
- [ ] **L8** Report to the owner. Commit explicit paths. The owner pushes.

S1 — Master planning — DONE 2026-10-29

- [x] Four parallel discovery passes: leads and workday, students and Student 360, access/admin/handoffs, test data/tooling/decisions.
- [x] Owner answers D1–D7. Wrote `documentation-analysis.md`, this plan, `documentation-progress.md`, the `screenshot-index.md` skeleton and the `discovery/` appendices.

S2 — Environment, capture tooling, admin set-up (creates personas) — DONE 2026-10-30

Features: ADM-001, ADM-002 (create/edit/re-send; deactivate is in S10), CFG-001, CFG-002 (view/edit rules; Run now is in S9), CFG-003 (5).

- [x] **S2.1 Stack.**
  - Worktree `.claude/worktrees/cns-docs`; run `docker compose -p cnsdocs -f docker-compose.yml -f docker-compose.docs.yml`.
  - The untracked `docker-compose.docs.yml` adds Mailpit on `127.0.0.1:8029:8025`.
  - The untracked `.env` is the repo `.env` with `WEB_PORT=3050`, `API_PORT=8050`, `FRONTEND_URL=http://localhost:3050`, `SMTP_HOST=mailpit`, `SMTP_PORT=1025`, `SMTP_USE_TLS=false`, no SMTP credentials, `SMTP_FROM_EMAIL=no-reply@edusphere.local`, `ENVIRONMENT=development`. Make sure the Zoho Mail API is **not** configured (ENH-032), so mail goes to SMTP/Mailpit.
  - The worker and beat must run. Seed from `045d8c40`.
  - Scratchpad scripts: `docs-env.sh` (DOCS_BASE_URL, DOCS_MAILPIT_URL, DOCS_PASSWORD from the seed, a random DOCS_TEST_PASSWORD) and `reset-stack.sh`.
- [x] **S2.2 Tooling (test-only).**
  - Add `export const COUNSELOR_ROOT` to `apps/web/tests/doc-capture/shoot.ts`.
  - Extend `signIn()` with an optional portal (`/admin/login`), keeping the default unchanged. This is the same shape as the telecaller/BDM branches, to ease later merges.
  - Add a set-password matcher to `mailLink`, a `#calendar-feed-url` mask, and a `counselor` mode in `docs/tooling/build-pdfs.mjs`.
  - Prove the Agent and School specs still list (`--list`).
- [x] **S2.3** Masking check on `account-access/01-overseas-login.png` and `admin-login.png`.
- [x] **S2.4 Standard loop.**
  - As the Overseas Admin:
    - create **Docs Counselor A/B/C** (ADM-001), including a duplicate-email error;
    - edit B and re-send the link from Users (ADM-002);
    - create the **Docs checklist template** in block mode (CFG-001);
    - view the reminder rules (CFG-002);
    - create a **Docs message template** (CFG-003).
  - As the Super Admin: show the create-user Division default (P4, shot only; cancel without saving).
  - Setup only, not documented features: create **Docs Telecaller** (Overseas, Employee ID `DOCS-TEL-1`, manager Lakshmi).
  - **Moved to S7 prep (2026-10-30): Docs University** with **Docs MSc Data Science** and **Docs MBA**, commission 10% / 12% (owner D5), via University Master (`/partnership/universities/new` → publish → add courses). Counselors only see published (catalogue-visible) universities.
  - S2 notes: `/admin/login` lands on `/admin` (no trailing slash); its demo card is titled "Demo super admin" — `shoot()` now masks it. Restoring a snapshot must restart `web` after `api` is healthy (scratchpad `restore-snap.sh`).
- [x] **S2.5** Snapshot `after-s2`.

S3 — Account access and navigation

Features: AUTH-001..006, NAV-001 (7).

- [ ] Standard loop.
  - Docs Counselor A/B/C set their passwords from Mailpit links (AUTH-002); C sets one too so they can be deactivated later.
  - Sign in at /overseas/login, forgot/reset password, change password, My profile, sign out.

    - Sidebar tour, plus the 390 px menu without Sign out (P18).
    - The deactivated-login message is captured in S10 and added to AUTH-006 then.
- ☐ Snapshot `after-s3`.

S4 — Leads and handoffs (lead side)

Features: HO-001, HO-002, LEAD-001..009, CONV-001, CONV-002 (13).

- ☐ Standard loop.
    - As Docs Telecaller, hand **Docs Lead Asha** and **Docs Lead Bilal** to Docs Counselor A (HO-001).
    - Submit a public website enquiry → **Docs Lead Chen** (HO-002); the Overseas Admin assigns it if needed.
    - As Counselor A: record walk-in lead **Docs Lead Divya** (LEAD-002); list (LEAD-001); detail, details edit, next action (LEAD-003..005).
    - Stages: move Asha to Qualified; close Bilal as Not Interested with a reason (LEAD-006, P5); qualification (LEAD-007).
    - Return Chen to the telecaller (LEAD-008; also show P2 on Bilal without submitting); milestones panel (LEAD-009).
    - Convert Asha → **Docs Converted Student** (CONV-001); link/unlink an existing student on Divya (CONV-002).
- ☐ Snapshot `after-s4`.

S5 — Activity, chat, follow-ups, tasks, calendar (= Day 1)

Features: ACT-001..006, CHAT-001, FUP-001, TASK-001, CAL-001, CAL-002 (11).

- ☐ Standard loop.
    - On Divya: call, WhatsApp record, email (lands in Mailpit), meeting, note, timeline (ACT-001..006).
    - Counselor Chat with Docs Converted Student (CHAT-001).
    - Follow-ups due today and **tomorrow** (FUP-001). Tasks due today, tomorrow and +7 days; complete one, cancel one (TASK-001, P10).
    - Appointments page and the no-show text (CAL-001, P8). Calendar page and feed URL, which is **masked** (CAL-002).
- ☐ Record “Day 1 = ” in the progress file. Snapshot `after-s5`.

S6 — Students and the Student 360

Features: STU-001..007, STU-010, HO-003, HO-004, ADM-003, ADM-004 (12).

- ☐ Standard loop.
    - As Counselor A: add walk-in **Docs Walk-in Student** and **Docs Pending Walk-in** (left pending); edit pending, resend (STU-003).
    - Students page / Application Tracking (STU-001); My students with the Source filter (STU-002, P17).
    - Student 360 Overview (STU-004), structured profile (STU-005), notes (STU-006), Activities/History (STU-007).
    - **Docs Self-registered Student** registers via the public sign-up (HO-004).
    - As the Overseas Admin:
        - assign the seeded agency application (Ananya) to Docs Counselor A (ADM-004, HO-003);
        - assign the self-registered student to A (ADM-003);
        - change Docs Walk-in Student’s counselor A → B with a reason, then back (ADM-003).
    - Counselor-side view of each reassignment (STU-010).

    - Super Admin: the counselor column is absent (shot for the “What each role sees” table).
- ☐ Snapshot `after-s6`.

S7 — Applications, offers, documents

Features: APP-001..010, OFR-001..003, DOC-001..004 (17).

- ☐ **S7 prep (setup only):** as the Overseas Admin, add **Docs University** (United Kingdom, so the S2 checklist matches; agent commission 10%), publish it, add **Docs MSc Data Science** (PG, course commission 12%) and **Docs MBA** (PG).
- ☐ Standard loop.
    - On Docs Converted Student: add application A1 (Docs University / Docs MSc Data Science, intake picker) (APP-001..003).
    - Checklist from the Docs template (DOC-001). Request documents due tomorrow (DOC-003). Upload a document (DOC-004). Documents page (DOC-002, P21).
    - Show the Ready-for-Submission block, then satisfy it (APP-005). Advance stages (APP-004, P12). Application details (APP-008, P14). Journey stage (APP-006). History (APP-009).
    - On Docs Walk-in Student: add application A2 (Docs MBA) and record an outcome / resume (APP-007).
    - Agency vs direct on the seeded agency application (APP-010, P22).
    - On A1: record an offer with expiry **tomorrow**, plus conditions and an interview (OFR-001..003). On A2: an offer with expiry +30 days, accepted (needed by S8).
- ☐ Snapshot `after-s7`.

S8 — Visa, finance, arrival, universities

Features: VISA-001, FIN-001..003, ARR-001, ARR-002, UNI-001, UNI-002 (8).

- ☐ Standard loop.
    - On A2: deposit record (FIN-001), Finance tab (FIN-002), deposit receipt / payment proof upload (FIN-003), visa case lifecycle (VISA-001), confirm enrolment (ARR-001), arrival and orientation (ARR-002).
    - Agency enrolment message vs panel on the agency application (P13): shot only, **do not confirm**.
    - Universities list and University 360 with the Docs course commission (UNI-001/002).
- ☐ Snapshot `after-s8`.

S9 — Time-based states, dashboards, admin oversight (≥ 3 days after S5)

Features: FUP-002, FUP-003, ESC-001, ESC-002, DASH-001, SRCH-001, REP-001, PERF-001, PERF-002 (9). Also the CFG-002 **Run now** step.

- ☐ Confirm the date is ≥ Day 1 + 3, and that the 00:05/00:10 jobs have run (expired offer on A1, overdue document request).
- ☐ Standard loop.
    - As the Overseas Admin: **Run now** on the reminder rules (CFG-002 step), counselor tasks (ESC-001), overdue by counselor + escalation notice (ESC-002), team performance A vs B (PERF-001), one counselor (PERF-002).
    - As Counselor A: overdue follow-ups on Tasks (FUP-002); reminder results and where they appear (FUP-003, P1); dashboard tiles and “View all” (DASH-001, P6); quick search (SRCH-001, P7); My performance (REP-001, P9).
- ☐ Snapshot `after-s9`.

S10 — Lifecycle: archive, consent, restore, deactivate

Features: STU-008, STU-009, CFG-004 (3). Also adds the deactivate steps to ADM-002 and the deactivated-login message to AUTH-006.

- ☐ Standard loop.
  - Docs Walk-in Student accepts consent on their dashboard; counselor view (STU-009).
  - Counselor A archives Docs Walk-in Student; Archived Students list (STU-008, P16).
  - The Overseas Admin restores them (CFG-004); the Super Admin refusal shot.
  - The Overseas Admin deactivates **Docs Counselor C** (ADM-002, P19); C's sign-in attempt (AUTH-006).
- ☐ Snapshot `after-s10`.

S11 — Guides and supporting pages

- ☐ `user-manual/README.md` and `admin-manual/README.md`. The admin README includes Super Admin differences and P3/P4/P15.
- ☐ Role guides: `overseas-counselor.md` (day-in-the-life, workflows 1–4), `overseas-admin-counselors.md`, `super-admin-counselors.md`.
- ☐ `demo-accounts.md` (D1), `faq.md`, `troubleshooting.md` (built from Common Errors and P-findings).
- ☐ Link check.

S12 — Final review and PDFs

- ☐ Parallel reviewers: accuracy against code, screenshots/secrets, style/terminology, links/structure. Fix all findings.
- ☐ Duplicate-screenshot check. Set Reviewed = PASSED/FAILED; mark COMPLETE.
- ☐ `documentation-review-report.md` (findings, P1–P22 status, partial features, owner items).
- ☐ PDFs: `node docs/tooling/build-pdfs.mjs counselor` → `docs/counselor-crm/pdf/`.
