Agent CRM Demo — Preparation Checklist

Agent CRM Demo — 45-Minute Script

Agent CRM Demo — UAT Checklist

Agent CRM Demo — Preparation Checklist

Environment: <https://dev.edusphere.org.uk>. Steps come from the Agent CRM user and admin manuals, which were browser-verified on 2026-10-05 against `main` @ `6a9be770`. Check that dev runs that build or a later one (see [Before you start](#)).

Do this **the day before** the demo. It takes about 60–75 minutes. You end up with one agency that already has data, so the dashboards, reports and commission screens have something to show. During the live demo you then register a **second** agency to show onboarding from the start.

Before you start

#	Check	How	Done
0.1	Dev is up	Open https://dev.edusphere.org.uk/overseas/login and <code>/admin/login</code> ; both pages load.	☐
0.2	Build on dev	Ask the team which commit dev runs. If it is older than <code>6a9be770</code> , the screens may differ from this script. <code>NEEDS_CONFIRMATION</code>	☐
0.3	Email delivery on dev	Create one test staff login (step 3.1) and check that the “Welcome to EduSphere – set your password” email arrives. If it does not, use the fallback in step 3.3. <code>NEEDS_CONFIRMATION</code>	☐
0.4	Online deposit payment	In step 5.4 click Pay deposit once. If the page says “Online payment is unavailable right now”, Razorpay is not configured on dev. Then show the deposit only as <i>Awaiting payment</i> in the demo (see the script’s fallback). <code>NEEDS_CONFIRMATION</code>	☐
0.5	“Demo accounts” card	The sign-in page of a development build can show a Demo accounts card. Decide whether the client may see it; if not, ask the team to turn it off on dev.	☐
0.6	Mailboxes	Use mailboxes you control for every account (for example <code>you+master@yourdomain</code>). Never type a client’s or a real student’s address: dev may send real email.	☐
0.7	Browser	Use Chrome with three profiles (or one normal and two incognito windows from different profiles), so Overseas Admin, Master and Staff can stay signed in side by side. Zoom 100 %, window at least 1440 px wide.	☐

Accounts to have ready

Write the passwords in your password manager, **not** in this document. Passwords need 10–128 characters.

Role	Sign-in page	Account (fill in)	Created in
Overseas Admin	/overseas/login	<overseas-admin-email>	Existing account on dev (ask the team)
Agency Master — prepared agency	/overseas/login	<demo-master-email>	Step 1
Agency Staff 1 (Verify documents + View reports)	/overseas/login	<demo-staff1-email>	Step 3
Agency Staff 2 (no extra permissions)	/overseas/login	<demo-staff2-email>	Step 3
Agency Master — live registration	/overseas/login > Create an account	<live-master-email> (fresh, never used)	During the demo
Spare staff login (created live)	—	<spare-email> (fresh, never used)	During the demo
Super Admin (optional, not shown)	/admin/login	<super-admin-email>	Existing

If dev was loaded with the standard seed, built-in accounts such as `overseasadmin@edusphere.local` and `agent@edusphere.local` exist. Prefer the fresh **Demo** accounts below, because the seed data is test data and can look odd in front of a client.

Step 1 — Register and approve the prepared agency (10 min)

1. Open `/overseas/login` and click **Create an account**.
2. Fill in **Full name**, **Email** (`<demo-master-email>`), **Account type** = **Education agent**, **Agency name (optional)** = `Demo Global Education`, and **Password**. Click **Create account**.
3. You see “Access unavailable — Agent registration is pending approval”. Leave this tab open.
4. In the Overseas Admin profile, go to **Agents** > **Agent Approvals** > **Pending** and click **Approve** for *Demo Global Education*. You see “Demo Global Education approved.”
5. Reload the Master’s tab. The **Agent Dashboard** opens. Note the agency code shown as “Your code {code}”.

Step 2 — Agency universities (5 min)

As the Master, open **Universities** > **Add university** and add two universities (**Name**, **Country**, **City**, **Entry requirements**), for example *Northbridge University, United Kingdom* and *Harbour Point College, Canada*. Each save shows “{name} added.” Catalogue universities are already there and do not need adding.

Agency universities are used **only on shortlists**. An application needs a **catalogue** university, which cannot be changed later. Before step 5, open **Applications** > **Create application** and note two or three catalogue universities offered in the **University** list on dev.

Step 3 — Staff logins and permissions (10 min)

1. **Team** > **Staff** card > **Add staff**: enter **Full name** and **Email** for Staff 1, then click **Add staff**. You see “{code} created. A set-password link was emailed to {email}.” The code is the agency prefix plus `-s001`

- (for example DEM-S001). Repeat for Staff 2.
- In each staff mailbox, open “Welcome to EduSphere – set your password”, click **Set your password** (the link is valid for 72 hours) and set a password.
 - Fallback if the email did not arrive:* click **Reset** on the staff row, or have the Overseas Admin send a new link from **Users > Manage users > Re-send link**.
 - On Staff 1’s row click **Permissions**, tick **Verify documents** and **View reports**, then click **Save**. Leave Staff 2 as “Student journey only”.

Step 4 — Students (15 min)

As the Master, open **Students > Add student** and create **8–10 students**. Only **Full name** is required, but add a **Preferred country** and a phone number so the cards look realistic. Use made-up names.

- Assign 5 students to Staff 1 and 2 to Staff 2 (**Assign > Assign to > Save assignment**), and leave 1–2 **Unassigned**. The dashboard’s staff table and Unassigned row then have content.
- Include **Aarav Mehta** (the hero student, assigned to Staff 1).
- For 2 students, including Aarav, record counseling (**View > Counseling > Record counseling**, fill career interest and budget, tick “Counseling completed” > **Save counseling**) and add 2–3 universities to the shortlist (**University shortlist > Add university to shortlist**). Put *Northbridge University* (an agency university) on Aarav’s shortlist, so the **Agency** badge shows.
- Keep one student, for example Priya Nair , unassigned and untouched.** You assign her live.

Step 5 — Applications at different stages (20 min)

Create 5–6 applications (**Applications > Create application: Linked student, University, Course, Intake**). Then move them so every filter tab has something in it:

Student	Take it to	How
A	Enquiry (Draft)	Create only
B	Submitted	Set Submitted on when you create it
C	Offer	Upload an Offer letter document for this application, then Offer > Record offer
D — the hero application	Offer + deposit + visa at Checklist	See 5.1–5.5 below
E	Withdrawn	Withdraw application > Yes, withdraw
F	Enrolled	Record an offer, then Enrollment > Enroll student > Confirm enrollment > Yes, confirm enrollment . This creates an <i>estimated</i> commission for step 6

Use catalogue universities for every application. For the hero application **D** (*Aarav Mehta* with a catalogue university, for example *University of Manchester* if dev’s catalogue has it):

- Upload an **Offer letter** (type “Offer letter”, with this application selected), then record a **Conditional** offer.
- Upload the visa documents you will tick (for example *Passport* and *Financial documents*) for **this application**, and **verify** them as the Master (**Documents > Pending > Review > Verified > Save**

decision).

3. **Deposit** > **Record deposit: Deposit required?** Yes, **Amount** ₹50,000, **Due date**.
4. Click **Pay deposit** once to test 0.4. If Razorpay test mode works on dev, finish the payment with a Razorpay **test** card and check that the deposit shows **Paid**. Do not record the visa decision or the enrollment yet; you do those live.
5. **Visa** > **Start visa case**, ticking **only** the documents you verified in 5.2. Leave the case at **Checklist**.

Step 6 — Commission ready to show (5 min)

1. As the Overseas Admin, open **Commissions** and find the *estimated* row for application F. Copy its **Reference** UUID into a note on your desktop.
2. Use **Set/adjust commission amount** to give it an amount (for example ₹75,000). The row becomes **eligible**. *Do not claim it yet*. The claim is part of the live demo.

Step 7 — Documents and tasks (5 min)

- As Staff 2, upload one document so **Documents** > **Pending** has an item for the Master to review live.
- Create 3–4 tasks (**Tasks & Follow-ups** > **New task**), one of them due yesterday **for a student assigned to Staff 1**, so Staff 1's **Overdue** tab is filled.

Step 8 — Final check (5 min)

- ☐ Master dashboard shows students, pipeline, documents and commission figures.
- ☐ **Reports** > **Applications** shows rows; **Download CSV** works.
- ☐ **Staff Performance** shows both staff members.
- ☐ The hero application is at visa **Checklist**, with all ticked documents verified.
- ☐ The commission UUID for application F is copied into your note.
- ☐ `<live-master-email>` has never been used on dev.
- ☐ Three browser profiles are signed in: Overseas Admin, Master, Staff 1.

After the demo

Data on dev stays. If the demo will be repeated, either keep the prepared agency and only register a new live agency each time, or ask the team to restore dev's database from a snapshot taken after this checklist.

`NEEDS_CONFIRMATION` : whether dev has a snapshot/restore procedure.

Next: [Demo script](#) · [UAT checklist](#)

Agent CRM Demo — 45-Minute Script

For client and prospect demos on <https://dev.edusphere.org.uk>. Run the [preparation checklist](#) first. Steps come from the Agent CRM manuals, browser-verified on 2026-10-05 against `main` @ `6a9be770`.

The story

An education agency joins EduSphere, gets approved, builds its team, and takes a student from first enquiry to enrollment. Along the way it collects the university deposit, runs the visa case, and earns and claims its commission. EduSphere's Overseas Admin oversees the whole network.

Window	Signed in as	Used in parts
A	Overseas Admin	1, 7
B	Agency Master (<i>Demo Global Education</i>)	2, 3, 4, 6, 7, 8
C	Agency Staff 1	5
D (incognito)	New agency registration	1

Run sheet

Time	Part	What the audience sees
0:00	Opening	Why agencies need one workspace
0:03	1. Onboarding	Agency registers; admin approves
0:09	2. Agency at a glance	Master dashboard
0:13	3. Team and permissions	Staff login, permissions, activity
0:18	4. Students	Add, assign, counsel, shortlist
0:24	5. A staff member's day	Notifications, application, documents, tasks
0:30	6. Offer to enrollment	Document review, deposit, visa, enrollment
0:37	7. Money	Commission claim and payout, deposit remittance
0:41	8. Insight	Reports, CSV, staff performance
0:44	Close	Recap and questions

Opening (3 min)

Say: "Agencies today juggle spreadsheets, email and WhatsApp to track students, documents, deadlines and commissions. EduSphere gives each agency its own secure workspace, connected to EduSphere's overseas team, so everyone works from the same record."

Show the sign-in page `/overseas/login`.

Part 1 — Agency onboarding (6 min)

Step	Window	Action	Expected result
1.1	D	<code>/overseas/login</code> > Create an account	"Create Overseas account" form
1.2	D	Fill Full name , Email = <code><live-master-email></code> , Account type = Education agent , Agency name = <i>Live Demo Agency</i> , Password > Create account	"Access unavailable — Agent registration is pending approval"
1.3	A	Agents > Agent Approvals > Pending > Approve on <i>Live Demo Agency</i>	"Live Demo Agency approved."
1.4	D	Reload	The new agency's Agent Dashboard opens (empty)
1.5	A	Agent network > click <i>Demo Global Education</i>	Agency detail: summary, commission, deposits, Masters, read-only agency records

Say: "Nobody gets into the agency workspace until EduSphere has approved them. The person who registers becomes the agency's Master. From the network view, EduSphere sees every agency's students, applications and money in one place. The records are read-only here, and every look at them is written to the audit log."

Tell the audience: EduSphere does not email the agency when it is approved. Your team lets them know.

Part 2 — The agency at a glance (4 min)

Window **B**: the **Agent Dashboard** of *Demo Global Education* ("Whole agency · Your code {code}").

Walk through the groups **Students**, **Pipeline**, **Documents** and **Commission**, then the breakdown by country and university, and the staff table with its **Unassigned** row.

Say: "The owner sees the whole agency: how many students are at each stage, which documents are waiting, what commission is claimable, and how each counsellor is doing. Money is shown per currency and never added across currencies."

Master dashboard

Part 3 — Team and permissions (5 min)

Step	Action	Expected result
3.1	Team > Staff card	Staff 1 and Staff 2, with their permissions
3.2	Add staff > Full name <i>Demo Counsellor</i> , Email <code><spare-email></code> > Add staff	"{code} created. A set-password link was emailed to {email}." with Set-up pending
3.3	Staff 1 row > Permissions	"What {name} can do": Verify documents, View reports
3.4	Staff 1 row > Activity	What Staff 1 did in the workspace

Say: "The Master creates staff logins. Staff set their own password from a secure link that expires after 72 hours. By default staff see only the students assigned to them. The Master decides who may verify documents and who may see reports. Up to three Masters can share ownership of an agency."

Part 4 — Students (6 min)

Step	Action	Expected result
4.1	Students	Student cards with Active / No login badges, Assigned to (or Unassigned), and search
4.2	Card <i>Priya Nair</i> > Assign > Assign to Staff 1 > Save assignment	"Priya Nair assigned to {code} · {name}."

9 / 20

Step	Action	Expected result
4.3	Open a prepared student > Counseling	Counseling record: interests, budget, completed
4.4	University shortlist	Shortlisted universities; agency universities carry the Agency badge
4.5	Journey > Show history	Every step of the student's journey, with who did it and when

Say: "Every student has one record: counseling notes, shortlist, documents, applications and a full history. When the Master assigns a student, the counsellor is notified straight away and the student's open tasks move with them."

Part 5 — A staff member's day (6 min)

Switch to window **C** (Staff 1).

Step	Action	Expected result
5.1	Dashboard	"Your assigned students" — only their own students; no Team or Commissions menu
5.2	Notifications	"Student assigned to you" for Priya Nair (from step 4.2)
5.3	Applications > Create application: Priya Nair, a catalogue university, Course, Intake > Create application	"Application created." (stage Enquiry)
5.4	Documents > Upload document: Priya Nair, type <i>Passport</i> , PDF file	"Document uploaded. It is waiting for review."
5.5	Documents > Request a document: Priya Nair, type, note > Add request	"Request added to Additional documents."
5.6	Tasks & Follow-ups > Overdue tab, then New task	Overdue follow-ups; a new task is added

Say: "Counsellors see only what they need: their students, their applications, their follow-ups. Uploaded documents go into a review queue, so nothing reaches a university unchecked."

Part 6 — From offer to enrollment (7 min)

Back to window **B** (Master), on the hero application (*Aarav Mehta* and his catalogue university).

Step	Action	Expected result
6.1	Documents > Pending > Review on Staff 2's upload > Verified > Save decision	"{document} for {student}: verified."
6.2	Applications > hero application > View	Application detail with Offer, Deposit, Visa and Enrollment sections
6.3	Offer	The recorded conditional offer and its conditions

Step	Action	Expected result
6.4	Deposit	₹50,000 deposit: Paid with Download receipt (or Awaiting payment , see the fallback below)
6.5	Visa > Move visa stage through Documentation > Interview prep > Tracking > Decision	Stage moves at each step
6.6	Record decision > Approved > Yes, record decision	"Visa decision recorded."
6.7	Enrollment > Enroll student > date > Confirm enrollment > Yes, confirm enrollment	"Enrollment confirmed." Stage Enrolled ; a commission is estimated

Say: "Applications only move forward, so the history can be trusted. The visa case cannot leave the checklist until every required document is uploaded and verified. Only a Master can confirm enrollment, and confirming it automatically starts the commission."

Deposit fallback: if online payment is not available on dev, show the deposit as **Awaiting payment** with the **Pay deposit** button, and explain that payment runs through Razorpay. A paid deposit becomes read-only and gets a receipt.

Part 7 — Money: commission and deposits (4 min)

Step	Window	Action	Expected result
7.1	B	Commissions	Rows with status; application F is eligible (amount set in prep)
7.2	B	Paste application F's Reference UUID into "Eligible commission reference" > Claim commission	"Commission claimed." and a claim reference CLM-...
7.3	A	Commissions > Approve commission payout > paste the same reference	"Payout approved – commission marked paid."
7.4	A	Agent deposits > Paid	Paid deposits with Record remittance / Record refund . If no deposit is Paid (Razorpay unavailable), describe these actions instead

Say: "Commission is created when a student enrolls. EduSphere sets the amount, the agency claims it, and EduSphere approves the payout. Deposits that agencies collect are tracked through to remittance to the university."

Only claim the *eligible* row from the prep. Do not claim the commission created in step 6.7. It is still *estimated* (amount 0), and claiming it locks the amount at 0 (open product finding P1).

Part 8 — Insight (3 min)

Step	Action	Expected result
8.1	Reports > Applications > Apply	"{N} rows · As of {time}"
8.2	Download CSV	A file such as <code>agency-applications-all-to-all.csv</code> downloads
8.3	Reports > Commission	Totals by status, university, country, intake
8.4	Staff Performance	Funnel from students to enrolled, and a per-staff table

Say: "Owners can see where students drop out of the funnel and which counsellor converts best, and export any report for their own analysis."

Close (1–2 min)

Recap: one workspace per agency · EduSphere approval and oversight · roles and permissions · the student journey from enquiry to enrollment · documents, deposit and visa under control · commission from enrollment to payout · reports and staff performance.

Invite questions. For a detailed check of every feature, hand over the [UAT checklist](#).

Do not show during the demo

These are open product findings or behaviour that has not been verified in the browser. See `docs/documentation-review-report.md`.

Avoid	Why
Claiming an estimated commission	It locks the amount at 0 (P1)
Agency screens as Super Admin	Agents/Commissions show "Workspace not found"; other screens are read-only (P2)
Typing real client or student email addresses	Dev may send real email (P3)
Commissions table raw words (<code>eligible</code> , <code>payout_pending</code>)	Present them as statuses; a UI polish item (P4)
Rejecting an agency and showing its message	It shows the same "pending approval" text (P5)
Refunding more than the paid amount	Refused only after confirmation (P6)
Task Student picker on screen share	Shows full student emails (P7)
Editing a task, editing an agency university, the 3-Master limit, the enrollment-date warning	Confirmed in code only, not rehearsed in the browser
Daily 08:00 reminders	Cannot be triggered live

If something goes wrong

Problem	Recovery
New staff did not get the welcome email	Show the Set-up pending badge and move on; mention Reset / Re-send link
"Cannot advance past the checklist stage – not yet verified: ..."	A ticked visa document is not verified. Verify it under Documents and retry
"Access unavailable — Agent registration is pending approval" after approval	Reload the page
"Commission cannot be claimed in its current status"	It is already claimed or paid; check the claim reference column
"Commission not found"	Wrong UUID pasted; copy the eligible row's UUID from your note. Never paste the estimated row from step 6.7
"Email already exists" at registration	Use a fresh <code><live-master-email></code>
Any page error	Reload; if it persists, switch to the matching screenshot in <code>docs/screenshots/</code>

Agent CRM Demo — UAT Checklist

For client stakeholders who want to check every feature after the demo. Every row links to the user or admin manual page that describes the full steps. Behaviour was browser-verified on 2026-10-05 against `main` @ `6a9be770`. Rows marked **(code)** were confirmed only in the application code and need a first browser check.

Record a result for each row: **P** = pass, **F** = fail (write what happened), **N/A** = not tested.

DP-01	Overseas Admin	Agent deposits > Paid > Record remittance	"Remittance recorded for {student}."	adm-005	
DP-02	Overseas Admin	Record refund ($\leq$ paid amount)	"Refund recorded for {student}." (final)	adm-005	

Do **not** claim an *estimated* commission during UAT on shared data: it locks the amount at 0 (P1). If you test it deliberately, record it as a finding against P1.

10. Reports and performance

ID	Role	Check	Expected result	Guide	P/F
RP-01	Master	Reports tabs with filters > Apply	"{N} rows · As of {time}"	rpt-001	
RP-02	Master	Download CSV	CSV downloads	rpt-002	
RP-03	Master	Commission tab	Totals per currency and by status/university/country/intake	rpt-003	
RP-04	Staff with View reports	Reports	Own students only; no Staff performance / Commission tabs	rpt-001	
RP-05	Staff without permission	Reports	"Access unavailable — Your agency Master hasn't given you access to reports"	agency-staff guide	
PF-01	Master	Staff Performance	Funnel and per-staff table	perf-001	

Known product findings

These are known and recorded. Note them, but do not log them as new defects: P1–P10 in `docs/documentation-review-report.md` §3.
